EDUCATION

Bachelor in Information Technology (BIT)   Aug 2023 – Current
Padma Kanya Multiple Campus, Bagbazar, Kathmandu

KEY PROJECTS

Restaurant Management System | *Python, Django, Bootstrap, HTML/CSS*

- Built a fully responsive website featuring home, menu, and contact pages using Django templates.

- Implemented a table booking functionality with backend form validation and clean URL routing.

- Designed a mobile-friendly UI using Bootstrap grid system to ensure accessibility.

Personal Portfolio Website | *Python, Django, HTML, CSS*

- Developed a centralized platform to showcase projects and skills using the Django backend.

- Created dynamic views for project details and integrated a working contact form.

- Optimized navigation and layout for a seamless user experience across devices.

Grocery E-Commerce Interface | *HTML, CSS, JavaScript*

- Designed an interactive UI with product categories and featured items.

- Implemented DOM manipulation for basic cart interactions and dynamic content rendering.

- Focused on clean, maintainable CSS structure for responsive layout.

Amazon Homepage Clone | *HTML, CSS*

- Created a pixel-perfect static clone of the Amazon homepage to master CSS Grid and Flexbox.

- Replicated complex layouts including the navigation bar, product grid, and footer.

Blog Management System | C#, ASP.NET MVC, Bootstrap, HTML/CSS

- Built a fully responsive blog website featuring home, blog posts, categories, and contact pages using Razor views and ASP.NET MVC.
- Implemented post creation, editing, and commenting functionality with backend validation, EF Core database integration, and clean URL routing.
- Designed a mobile-friendly UI using Bootstrap grid system to ensure accessibility across devices.
