PROFESSIONAL SUMMARY

Dynamic and self-motivated IT undergraduate with hands-on experience in Python and Django backend development. Built and shipped a full-scale REST API platform (SewaConnect) alongside several personal full-stack projects, proving the ability to master complex technologies rapidly through independent work. Seeking a Software Engineering / Python Developer position to apply this practical experience and relentless problem-solving drive within an innovative team.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), HTML5, CSS

Frameworks: Django, Django REST Framework

Databases: PostgreSQL

Tools: Git, GitHub, VS Code, Postman, pytest

Concepts: REST APIs, JWT Authentication, OOP

KEY PROJECTS

SewaConnect — Online Home Service Management System

Python, Django REST Framework, PostgreSQL, Celery, Redis, JWT, JavaScript

- Designed and built a Django REST Framework backend with ~40 API endpoints across 10+ apps, backed by PostgreSQL.
- Implemented JWT-based authentication and role-based access for customers, providers, and admins.
- Used Celery with Redis to handle asynchronous booking auto-reassignment when providers don't respond in time.
- Designed core backend algorithms: Haversine-based distance calculation, an 8-factor weighted provider recommendation engine, greedy provider assignment, and interval-overlap booking conflict detection.
- Built the frontend in vanilla JavaScript consuming the REST APIs; wrote unit, integration, and system tests against the live codebase.

Restaurant Management System

Python, Django, Bootstrap, HTML/CSS

- Built a fully responsive website featuring home, menu, booking and contact using Django templates.
- Integrated an AI assistant to suggest menu items and assist users.
- Implemented a table booking functionality with backend form validation and clean URL routing.
- Designed a mobile-friendly UI using Bootstrap grid system to ensure accessibility.

Personal Portfolio Website

Python, Django, HTML, CSS

- Developed a centralized platform to showcase projects and skill using the Django backend.
- Created dynamic views for project details and integrated a working contact form.
- Optimized navigation and layout for a seamless user experience across devices.

Grocery E-Commerce Interface

HTML, CSS, JavaScript

- Designed an interactive UI with product categories and featured items.
- Implemented dynamic cart functionality using JavaScript (add/remove items, update price).
- Implemented DOM manipulation for basic cart interactions and dynamic content rendering.
- Focused on clean, maintainable CSS structure for responsive layout.

EDUCATION

Bachelor in Information Technology (BIT)

Padmakanya Multiple Campus, Bagbazar, Kathmandu

Aug 2023 – Current

ADDITIONAL

- Comfortable working independently as well as in cross-functional teams; strong written and spoken communication in English and Nepali.
- Actively building QA and testing skills (Selenium, pytest) alongside backend development, which strengthens attention to code quality and debugging.
